# Bryce Sampson

FRONT END DEVELOPER

## Profile

Currently working with Vue.js and React.js to create web based applications using Google Firebase products. Experienced with Nuxt/Next to accelerate development. Using Material or Bootstrap front end libraries for most projects. Using Node and Express to power backends.

Experienced using Jenkins on projects with continuous development. Testing code with Selenium and Maven. Write most test scripts in Javascript, but experienced with Java as well.

Coping with the virus by freelancing while traveling the country in an RV with my wife and two dogs. Enjoying every minute of it.
